

Sage MAS Intelligence (SMI)

Brenda Keene

2010

What is SMI?

- Excel-based reporting tool with access to:
 - All modules and data
 - Multiple company databases
- Allows for easy reporting and analysis through Excel
- Includes predefined financial and operations reports with user-level security
- Can be added to MAS 90/200 desktop
- Works with version 4.4

Report Manager

- Allows creation of new reports from existing data containers
- Defines filters, sorting, summations and parameters
- Supports auto-emailing reports, scheduling reports and publishing report output to HTML for intranet/Internet

Report Designer

- An add-in built into Excel
 - Provides simplified “drag and drop” report creation capabilities
 - Makes report design simple, flexible and fast
 - Builds impressive reports showing critical business analytics

Report Viewer

- Allows basic editing capabilities such as filtering and changing of parameters
- Offers drill-down functionality on existing reports and templates

Connector

- Allows for defining data containers
- Simplifies financial managers' day-to-day operational tasks
- Allows for consolidations from multiple companies and connectivity to unlimited ODBC data sources
- Includes a graphical join tool to simplify database queries

Standard Reports

- Intelligence ships with predefined report templates to get you up and running immediately
 - Dashboard Analysis
 - Financial Report and Consolidated Financial Report
 - Financial Trend Analysis
 - General Ledger Transaction Details
 - Inventory Status
 - Vendor Purchases
 - Customer Sales
